
Computer Engineering graduate and current MSc Banking & Finance candidate with a strong analytical background. Adept at bridging technical data processing (SQL, Python, Excel) with financial analysis. Passionate about investments and seeking an Investment Analyst role to leverage my technical toolkit and engineering mindset to support high-quality database management and investment research.

Work experience

Exclusive Agents | Real Estate Consultant

Athens, Greece | April 2026 - Present

- **Market Analysis & Property Valuation:** Conduct comparative market analysis using recent sales data of similar properties to advise clients on accurate pricing and current market trends.
- **Client Acquisition & Relationship Management:** Perform lead generation through cold calling and manage client relationships, conducting property presentations and consultations.

Netcompany-Intrasoft | Internship Trainee

Athens, Greece | Oct 2025 – April 2026

- **Business Analysis & Collaboration:** Translated client requirements into actionable solutions, partnering with cross-functional teams to align technical outputs with strategic business goals.

Lifeguard Academy of Northern Greece (NABE) | Team Leader / Supervisor / Lifeguard

Northern Greece | 2020 - 2025 (Seasonal)

- **Team Leadership & Operations:** Directed a 25-member team, ensuring strict regulatory compliance and precise operational reporting under high-pressure conditions.

Education

University of Piraeus

MSc in Banking and Finance
Athens, Greece | 2026 - Expected Graduation:2028

International Hellenic University

Computer Informatics & Telecommunications Engineering
Serres, Greece | 2018 - 2026

Skills

- **Hard Skills:** Investment Research & Fundamental Analysis • Asset Valuation • Python & SQL • Microsoft Excel
- **Soft Skills:** Communication • Time Management • Critical Thinking • Emotional Intelligence • Adaptability
- **Languages:** Greek (Native) • English (B2).

Projects & Independent Experience

o **Independent Portfolio Management & Equity Research:** Actively managing a personal US equity portfolio driven by comprehensive fundamental and technical analysis. Evaluating quarterly earnings, historical financial trends, and management quality, while conducting peer comparisons and financial forecasting using core valuation metrics (P/E, P/S, FCF, Margins) to assess risk-reward probabilities.

o **Financial Tracker Web App:** Built a user-centric dashboard combining real-time data visualization via REST APIs with an AI stock analysis feature, simplifying complex market trends for the end user (React, Python, REST API)

o **Lifeguard Mobile App (Bachelor Thesis):** Built a full-stack Android app to track lifeguard workdays, calculate pay, log incidents and equipment, and present data in web-based tables (Java, XML, PHP, MySQL, SQLite)
